

# Finish your customers' jobs quicker than ever before...

...with the **NEW Auto set Vectra SGTR** glueless turret rewriter, saving hours of costly set-up time.

To run in-line with most printing presses/converters or independently with a standalone unwind/slitting unit.

Featuring **fully automatic job changeover** – exactly as the name suggests! Simply enter the outside core diameter into the HMI and all mechanical positions are precisely set up ready for the next job.
